

- Bisa menggunakan api publik yang sesuai proyek masing masing

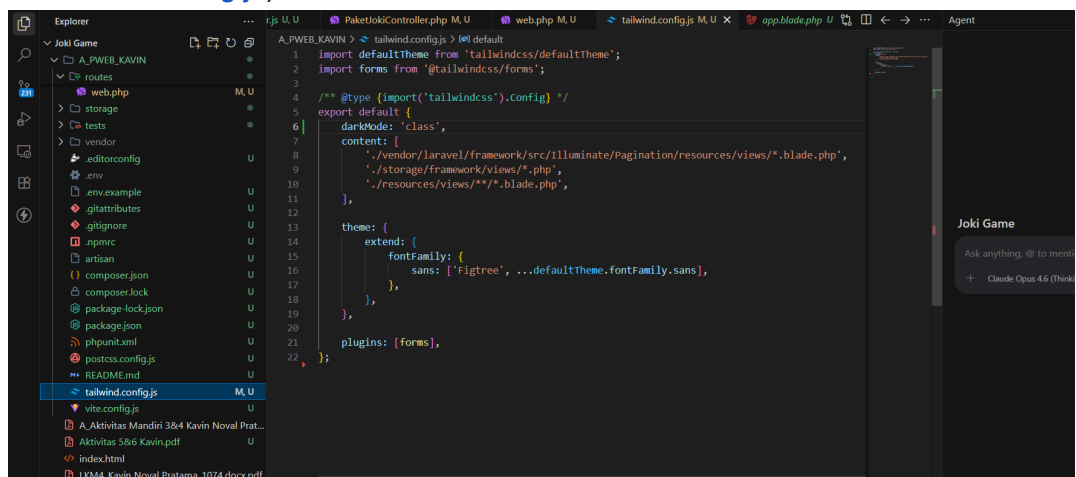

2. Buat live search yang memiliki form sederhana untuk mencari mahasiswa. Form dikirim via AJAX POST/ GET ke Laravel — halaman tidak boleh reload sama sekali. Setelah berhasil, catatan baru langsung muncul di daftar bawah tanpa refresh. Gunakan CSRF token yang benar.

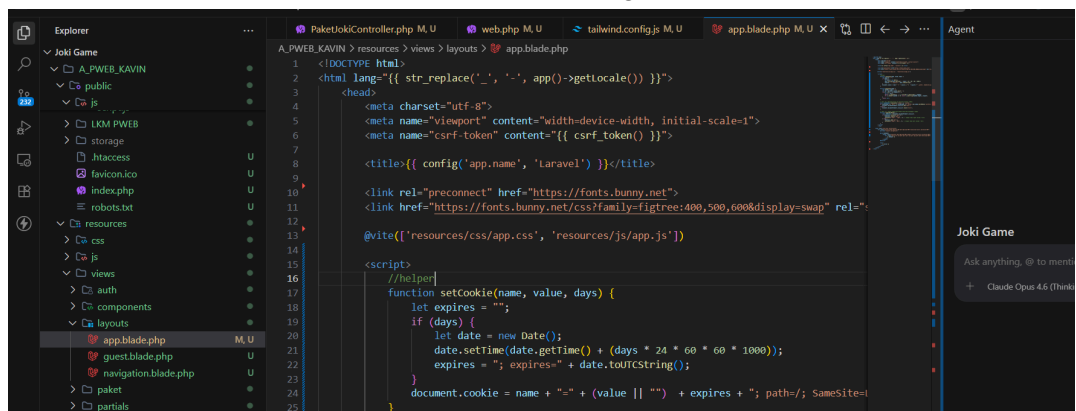

3. Buat navbar untuk mengeset dark mode.

- Tambahkan dark mode ke konfigurasi Tailwind (darkMode: 'class' di [tailwind.config.js](#))

- Buat helper function JavaScript: setCookie, getCookie, deleteCookie

```

function getCookie(name) {
  let nameEQ = name + "=";
  let ca = document.cookie.split(';');
  for(let i=0;i < ca.length;i++) {
    let c = ca[i];
    while (c.charAt(0)==' ') c = String(c).substring(1,c.length);
    if (c.indexOf(nameEQ) == 0) return c.substring(nameEQ.length,c.length);
  }
  return null;
}

```

```

function deleteCookie(name) {
  document.cookie = name + '=; Path=/; Expires=Thu, 01 Jan 1970 00:00:01 GMT;';
}

```

- c. Implementasikan toggle dark mode: klik tombol → toggle class 'dark' di HTML → simpan ke cookie

```

// toggle dark mode
function toggleDarkMode() {
  const htmlClass = document.documentElement.classList;
  if (htmlClass.contains('dark')) {
    htmlClass.remove('dark');
    setCookie('theme', 'light', 7);
  } else {
    htmlClass.add('dark');
    setCookie('theme', 'dark', 7);
  }
}

```

- d. Terapkan cookie di awal load (dalam tag script di <head>) untuk mencegah flash of unstyled content

```

// flash
const savedTheme = getCookie('theme') || 'system';
if (savedTheme === 'dark' || (savedTheme === 'system' && window.matchMedia('(prefers-color-scheme: dark)').matches)) {
  document.documentElement.classList.add('dark');
} else {
  document.documentElement.classList.remove('dark');
}

```

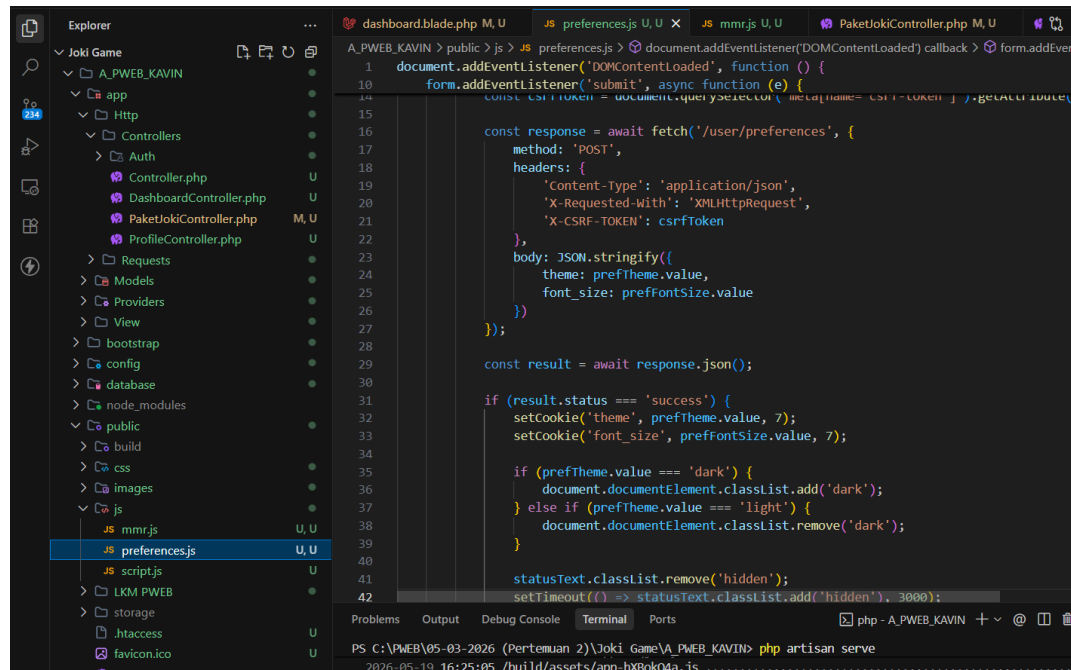

- e. Buat halaman pengaturan /preferensi dengan form: pilihan tema (light/dark/system), pilihan ukuran font

```

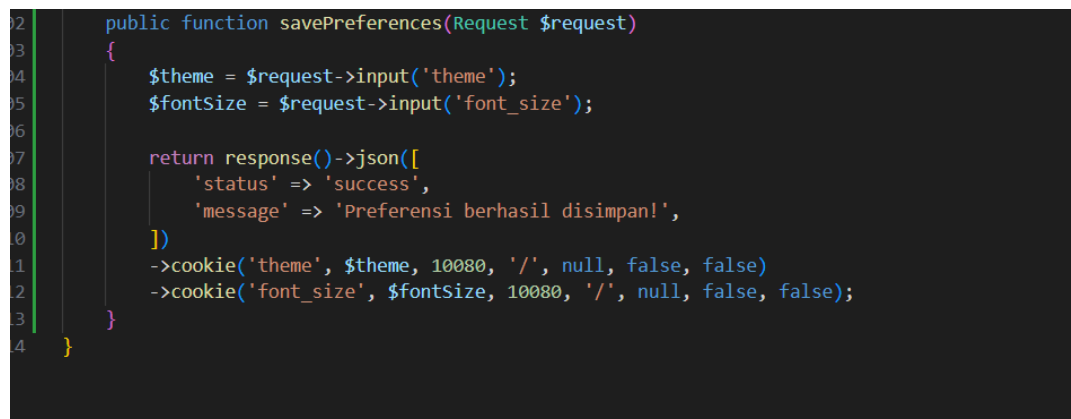

<div class="grid grid-cols-1 md:grid-cols-2 gap-4">
  <div>
    <label class="block text-sm font-medium mb-1 dark:text-gray-200">Pilih Tema
    <select id="pref-theme" class="bg-white dark:bg-gray-800 border border-gray-300 dark:border-gray-700 text-gray-900 dark:text-gray-100">
      <option value="light">Light Mode</option>
      <option value="dark">Dark Mode</option>
      <option value="system">System Default</option>
    </select>
  </div>
  <div>
    <label class="block text-sm font-medium mb-1 dark:text-gray-200">Ukuran Font
    <select id="font-size" class="bg-white dark:bg-gray-800 border border-gray-300 dark:border-gray-700 text-gray-900 dark:text-gray-100">
      <option value="12">12px</option>
      <option value="14">14px</option>
      <option value="16">16px</option>
      <option value="18">18px</option>
      <option value="20">20px</option>
      <option value="24">24px</option>
    </select>
  </div>
</div>

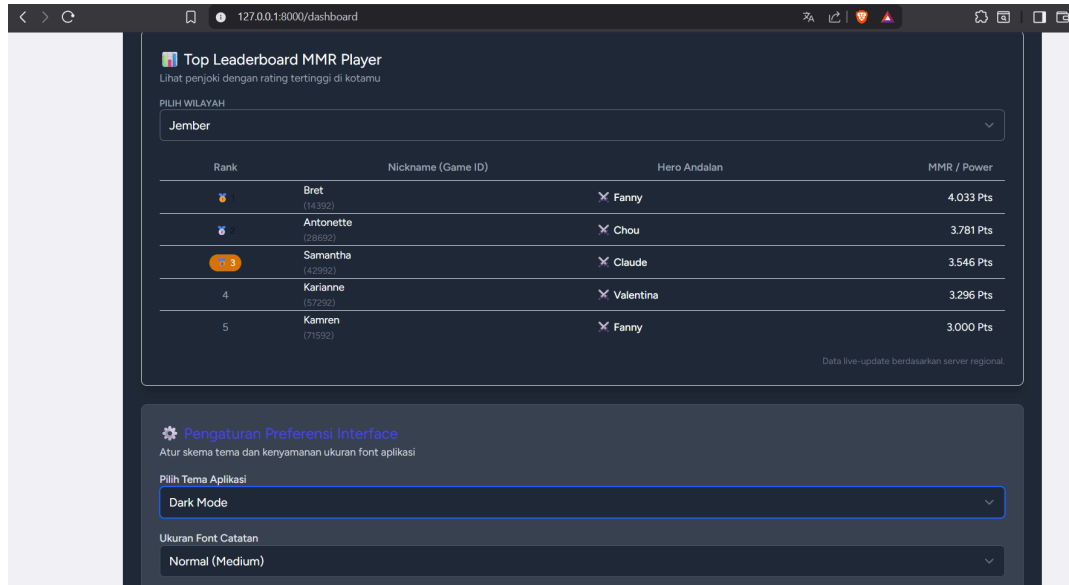

```

- f. Simpan form ke cookie via Fetch POST ke endpoint Laravel

- g. Laravel Controller: baca cookie dari `$request->cookie()`, kembalikan JSON konfirmasi

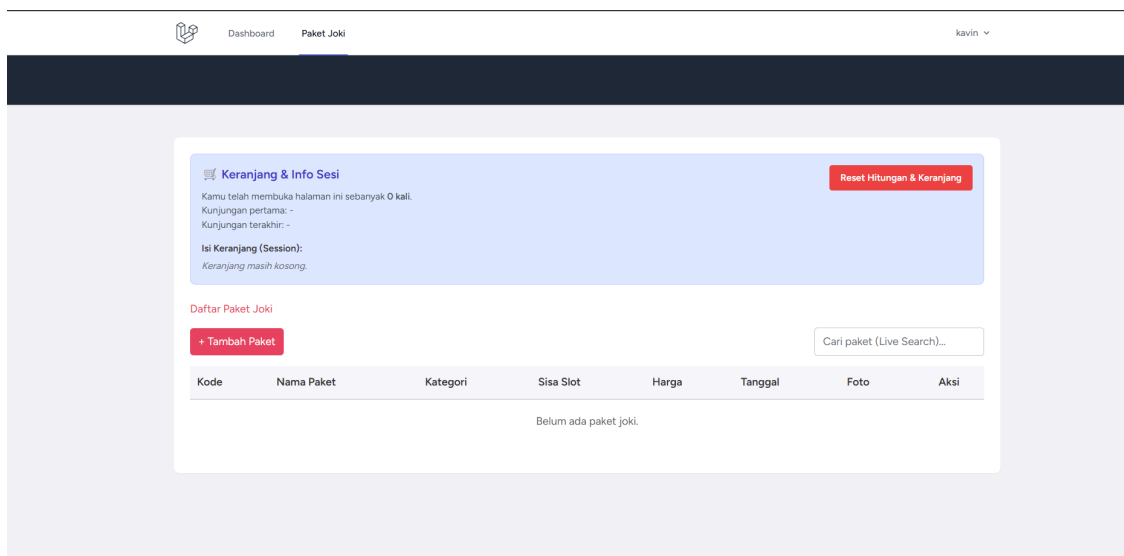

4. Buat section yang menghitung berapa kali pengguna mengunjungi halaman tersebut menggunakan session Laravel. Tampilkan: jumlah kunjungan, waktu kunjungan pertama, dan waktu kunjungan terakhir. Sediakan tombol "Reset Hitungan" yang menghapus data dari session dan mengulang dari awal.

```

1
2 Route::post('/dashboard/reset-visit', function (\Illuminate\Http\Request $request) {
3     $request->session()->forget(['visit_count', 'first_visit', 'last_visit']);
4     return redirect()->route('dashboard')->with('success', 'Statistik aktivitas berhasil direset');
5 }->middleware(['auth']->name('dashboard.reset'));
6
7

```

Bisa menggunakan case cart, sesuaikan dengan proyek
